

## Confirmation Form of Elective Required Core Courses for Master's Program, Department of Photonics

1. The courses selection shall be handled in accordance with Point 3 “Credit System and Course Requirements” of Article 2 of the Related Regulations of the Postgraduate Degree Examination for Graduate Students of the Master's Program of the Department.
  
2. The graduate students of the master's program must complete the required courses and the minimum graduation credits of 26 credits within two years after the enrollment, of which 15 credits must be completed for the optoelectronic courses administered by the Department, **“including 4 required courses and 1 elective required core course (which should be signed and approved by the advisor).”**
  - (a) Required courses: Electromagnetic Fields in Optoelectronics, Optoelectronics, Seminar I, and Seminar II.
  - (b) The elective required courses in three major fields are as follows:
  
3. The “Confirmation Form of Elective Required Core Courses for Master's Program, Department of Photonics” must be signed and approved by the advisor and submitted to the graduation credits review undertakers of this Department for record no later than the first semester of the graduation academic year.

Name		Student's ID No.		E-mail	
Advisor		Lab Name			
Three Major Fields		Elective Required Core Courses (Please check at least 1 course.)			
Optoelectronic Materials and Components		<input type="checkbox"/> Optoelectronic Materials <input type="checkbox"/> Semiconductor Optoelectronic Components			
Optical Communication and Optical Information		<input type="checkbox"/> Fiber Optical Communication System <input type="checkbox"/> Principles of Modern Communication			
Display and Alternative Energy		<input type="checkbox"/> Principles and Applications of Organic Optp-Electronic Materials <input type="checkbox"/> Organic Electro-optical Devices			
Advisor's Signature			Date
